

[Is your child living with Rett Syndrome?](#)

We are conducting a research trial to evaluate the safety, tolerability and efficacy of an investigational product called Sarizotan in reducing respiratory abnormalities in patients with Rett Syndrome

Patients may be eligible who:

- ✓ are 13 years and older,
- ✓ have a body weight of at least 25 kg (55 lbs), and
- ✓ experience multiple episodes of breath holding (apnea) while awake during the day

The study is being conducted at the following locations. If you are interested to learn more about this study, please contact the site nearest to you.
